-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Receipt is acknowledged of the information disclosure statement filed

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-47 of copending Application No. 09/901,983 ('983). Although the conflicting claims are not identical, they are not patentably distinct from each other because '983 claims a method of administration of an active agent by delivering the active agent, promoting dissolution of said active agent, and promoting absorption of the active agent. Those of ordinary skill would have expected similar therapeutic results from the instant pharmaceutical claims which has a first portion for promoting dissolution, and a second portion for promoting absorption. There are no unusual and/or unexpected results which would rebut prima facie obviousness. As such, it would have been obvious for the ordinary

Art Unit: 1615

practitioner to claim the instant pharmaceutical given the claims of '983 which set out a method of administering and active agent with the same properties as set out in the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-3, 24-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Pather et al (US Pat No 6,200,604).

Pather et al disclose a composition and method of drug delivery which comprises an effervescent (to promote absorption) and a pH adjusting agent (see Abstract) for buccal, sublingual, and gingival delivery. The pH adjusting agent may be used to promote dissolution (see column 4, lines 25-28). Bioactives for incorporation are listed at col. 4, lines 3-20. The effervescence of the formulation works as a result of its mucus stripping properties (col. 4, line 32). Glidants, Lubricants, binders and flavoring are all excipients disclosed for incorporation at col. 4, lines 53-58. Specific binders are found at col. 4, lines 59-64. The instant pharmaceutical composition is anticipated by Pather et al.

Claims 4-23 are objected to as dependent upon a rejected base claim.
